Executive Summary

StafflyAI is a premium outsourcing company that delivers AI Enhanced Operators to high income entrepreneurs. Our operators are vetted, trained, and equipped with the StafflyAI Leverage System, a proprietary set of AI powered workflows and automations that give clients 2 to 3 times the output of a traditional hire.

Target Market

We serve founders, professionals, and entrepreneurs earning at least \$150k per year who value leverage over cheap labor. Current success has come from dentists, real estate professionals, and law firms, each of which runs operators on a full time 40 hour per week basis.

Core Services

- AI Enhanced Operators: Full time talent seats trained with AI workflows to remove admin bottlenecks and double productivity.
- Websites: Conversion ready websites that drive revenue and patient or client bookings.
- Web Apps: Custom MVPs and applications built for entrepreneurs who want to launch and scale fast.
- AI Adoption: Workflow automation and AI integration to reduce operational costs and accelerate efficiency.

Industry Niches & Role Placement Philosophy

At StafflyAI, we don't specialize in one niche — we specialize in **placing the right operator into the right role.**

Our recruitment framework is **role-based, not industry-bound**, allowing us to deliver consistent results across multiple verticals.

Each placement focuses on removing repetitive work while implementing AI workflows that multiply output through the **StafflyAI Leverage Playbook.**

Role-Based Recruitment Model

Operator Level	Core Focus	Best For
Support Operator	Handles recurring, low-complexity tasks such as inbox, scheduling, CRM updates, and data entry.	Early-stage founders or small teams needing structure and time freedom.
Administrative Operator	Owns communication, reporting, and marketing coordination using automations.	Growing companies with consistent client flow.
Executive Operator	Operates as the founder's right hand, managing communications, meetings, and priorities.	Established founders managing teams or multiple projects.
Enterprise Operator	Functions as Chief of Staff, managing other operators, budgets, and execution.	Scaling organizations with multiple departments or ventures.

Cross-Industry Applications

Our operators currently serve clients across a wide range of industries:

- **Professional Services** – Law firms, accountants, consultants → document prep, scheduling, research, and client relations.
- **Healthcare & Dental** – Appointment management, billing, and patient follow-ups.
- **Real Estate & Construction** – Transaction coordination, CRM upkeep, and AI-powered social media research and posting.
- **Marketing & Creative Agencies** – Campaign coordination, reporting, and automation of content R&D.
- **Technology & SaaS** – Onboarding, QA, CRM management, and client support through Notion, ClickUp, or API workflows.
- **E-Commerce & Retail** – Order management, support, vendor coordination, and inventory automations.
- **Education & Coaching** – Onboarding, scheduling, and community engagement enhanced by AI workflows.

We don't hire "VAs."

We develop **Operators** — human professionals enhanced by AI who adapt to any vertical by mastering workflows and delivering measurable results.

Differentiation

- AI Enhanced Productivity: Operators equipped with the StafflyAI Leverage System for 2–3x output.
- Seat Model, Not Hourly: Dedicated full time schedules with flat monthly pricing.
- Client Success Manager: Done for you HR, performance reporting, and wellness support.
- Operator Growth Path: Career ladder and Talent Partner opportunities for operators, ensuring stability and loyalty.
- Philippines First Ethos: Operators earn 1.5 to 2 times above local wages, with mentorship and professional development.

Vision

Our vision is to become the number one platform connecting global businesses with AI Enhanced Operators while building pathways for Filipinos to grow from entry level operators into executives and entrepreneurs. The Philippines has evolved beyond call centers. StafflyAI is setting the new global standard for outsourcing by merging human operators with AI leverage to fuel growth, efficiency, and innovation.

Services & Pricing (External-Facing)

Last Updated: Sep 30, 2025

1. AI Enhanced Operators (Core Service)

Promise

Full time operators from the Philippines equipped with the StafflyAI Leverage System. Each operator delivers two to three times the output of a traditional hire by combining human skill with AI workflows and automation.

Packages & Pricing (in progress)

Task Operator – 20 hours per week – \$1,800 per month

Business Operator – 30 hours per week – \$2,400 per month

Full Operator – 40 hours per week – \$3,000 per month

Executive Operator – premium right hand executive assistant – \$4,500 to \$5,000 per month

Pricing Table (in progress)

Package	Monthly Hour Delivery	Price (USD)	Best For
Support Operator	Up to 100 hours	\$1,200-1,500 per month	Founders needing basic task delegation
Administrative Operator	Up to 120 hours	\$1,800-2200 per month	Professionals offloading 70–80% of admin
Executive Operator	Up to 160 hours	\$2,500-3000 per month	Businesses ready for full-time support
Enterprise Operator	40 hrs/week+	\$4,500–\$5,000/mo	CEOs needing high-trust executive assistant

Differentiators

- Operators trained on AI workflows, not just admin task
 - Dedicated full time schedules (no multi-client juggling)
 - Client Success Manager included: HR, performance tracking, wellness support
 - Operators earn 1.5–2x above local average → loyalty and stability
 - Proven success in Dentistry, Real Estate, and Law Firms
-

2. Websites (Conversion-Ready Sites)

Promise

Websites designed to convert visitors into customers, patients, or clients. Each site is supported by operators and developers who maintain, update, and optimize performance.

Packages & Pricing (in progress)

Revenue Site Build – \$5,000 to \$8,000 one time

Monthly Backend Maintenance Plan – \$500-\$1000/mo

- Traffic
- Customer Information
- Site will not crash
- Monthly Website Report (KPI's & Analytics)
 - Website is being visited
 - HEYGEN x Monthly Report being sent.

Pricing Table (in progress)

Package	Price (USD)	Best For
Revenue Site Build	\$5,000–\$8,000 one-time	Entrepreneurs wanting a conversion-focused website
Site Continuity Plan	\$500-1000/mo	Businesses needing ongoing CRO and maintenance support

Differentiators

- Built with conversion-first design principles
- Ongoing CRO tweaks, not just static builds
- SEO partnerships available for traffic growth
- Dedicated operator assigned for edits and monitoring
- Industry-tailored funnels (patient booking for dentists, lead capture for real estate, client intake for law firms)

3. Web Apps (MVP to Scale)

Promise

Custom web apps and MVPs built to generate revenue fast. Each app is paired with an operator for support, coordination, and ongoing updates.

Packages & Pricing (in progress)

MVP Build – \$10,000 to \$25,000 setup

AppOps Continuity – \$2,000 to \$3,000 per month

Pricing Table (in progress)

Package	Price (USD)	Best For
MVP Build	\$10,000–\$25,000	Startups needing to launch quickly
AppOps Continuity	\$2,000–\$3,000/mo	SaaS/Agencies needing long-term support

Differentiators

- MVPs built with revenue models baked in (freemium, upsells, subscriptions)
- Usage analytics and pricing experiments to maximize adoption
- Offshore dev + operator hybrid = faster delivery at lower cost
- Dedicated operator assigned for communication, reporting, and coordination

Suitable for SaaS startups, agencies, and entrepreneurs with validated ideas

4. AI Adoption (Workflow Automation)

Promise

AI workflows and automations that cut operational costs in half while doubling productivity.

Packages & Pricing (in progress)

AI Efficiency Audit – \$2,500 one time

Workflow Buildouts – \$10,000 to \$50,000 depending on scope

AI Ops Retainer – \$3,000 to \$5,000 per month

Pricing Table (in progress)

Package	Price (USD)	Best For
AI Efficiency Audit	\$2,500 one-time	Companies wanting a roadmap for automation
Workflow Buildouts	\$10,000–\$50,000	Businesses ready for end-to-end automation
AI Ops Retainer	\$3,000–\$5,000/mo	Firms needing continuous AI updates & support

Differentiators

- End-to-end diagnostic of bottlenecks and automation opportunities
- Pre built AI workflows for research, CRM, and repetitive tasks
- Custom automation development integrated with client APIs
- Operators trained on new workflows for seamless adoption
- Industry-tailored solutions: dentist billing, real estate social media, law firm document handling

Brand Foundation

Mission Statement

To redefine outsourcing by building the world’s first platform of **AI Enhanced Operators**—Filipino talent trained to become long-term Executive Assistants and future Chiefs of Staff.

We exist to give founders leverage, buy back their time, and scale their businesses, while nurturing operators to master AI, grow in responsibility, and evolve into trusted executives who support companies for years to come.

Vision

To set the global standard for outsourcing by creating a marketplace where entrepreneurs gain leverage through AI Enhanced Operators—and where Filipino talent builds lasting careers as high-trust executives.

StafflyAI is not about short-term gigs. It's about long-term partnerships between founders and operators, powered by AI, that compound over time.

Brand Personality

StafflyAI is bold, premium, and forward-thinking. We don't sound like Fiverr or Upwork—we sound like the future of business leverage.

- **Tone:** Direct, confident, results-focused.
 - **Positioning:** Premium, innovative, visionary.
 - **Style:** Clear, no fluff, always outcome-driven.
 - **Keywords:** Leverage. Growth. Productivity. Systems. Future.
-

Core Values (Internal – MEDCO)

(For culture and internal decision-making. Not public-facing.)

M – Meritocracy → Advancement is earned through performance and production.

E – Excellence → Constant improvement is expected from all members.

D – Don't Exploit Our Own Kind → We exist to uplift Filipino talent, not exploit them.

C – Clarity / Transparency → Open, honest communication on contracts, pay, and value.

O – Opportunity → StafflyAI is a platform to build lasting careers, income, and businesses.

Core Values (External – Client Facing)

(For website, sales, and client communications.)

1. Leverage First → We give founders back their time and multiply output through AI Enhanced Operators who deliver 2–3x the productivity of a traditional hire.

2. Results Over Tasks → Operators aren't task-doers—they run frameworks, manage workflows, and drive measurable outcomes.

3. Loyalty by Design → Our system promotes focus, stability, and consistency. Operators are incentivized to commit long-term to their assigned seats, ensuring reliable support for clients.

4. Premium Talent, Premium Support → Operators are matched, trained, and supported by Client Success Managers who handle HR, reporting, and wellness oversight.

5. Innovation Always → We continuously upskill operators on AI workflows and automations that keep clients ahead of the curve.

CEO Legacy (Vision + Positioning)

“My goal is not just to build another outsourcing company—it's to lead the evolution of Philippine talent.

StafflyAI will be remembered as the company that gave entrepreneurs true leverage by providing long-term operators who became indispensable partners in growth.

At the same time, we'll be the platform that nurtured Filipino operators into executives—Executive Assistants, Chiefs of Staff, and future leaders—through AI adoption, mentorship, and career stability.

We're here to prove that Philippine talent isn't just support—it's the backbone of the next generation of global businesses.”

Tagline (External Use)

AI Enhanced Operators for Long-Term Leverage

Client Journey

Our 6-Step Sales & Service Cycle (Final Version)

1. Acquisition

We acquire clients through **outbound calling, referrals, and affiliates**.

Referrals remain the highest-quality source — most clients send 4–5 new introductions each year.

Long term, we plan to **dominate LinkedIn** for founder and business owner outreach while automating top-of-funnel prospecting.

2. Discovery / Strategy Call

Every journey begins with a **consultation call** to diagnose bottlenecks, understand business goals, and determine which of our four service lines provides the best leverage:

- **AI-Enhanced Operators** (Support, Administrative, Executive, Enterprise)
- **Website Development**
- **Web App Development**
- **AI Adoption & Workflow Integration**

This call ends with a clear recommendation — if we can help, the next step is the **Business Operations Audit**.

3. Business Operations Audit (\$500 Deductible)

Once fit is confirmed, clients book a **Business Operations Audit** — a tailored deep-dive session that maps out exactly how StafflyAI will plug into their business.

The audit functions as our **paid discovery and blueprinting phase**, customized to each service type.

The \$500 investment is **credited toward their first invoice** and covers our time in sourcing, design, and implementation planning.

♦ **If pursuing an Operator Placement:**

We review **candidate profiles** and define the operator's role and scope of work.

- Assess daily workflows, communication cadence, and task systems.
- Identify automation opportunities (e.g., CRM syncs, content research bots).
- Set expectations on deliverables, reporting cadence, and early outcomes.
By the end, the client has a complete **Operator Action Plan** — outlining exactly what the operator will do, when, and how.

♦ **If pursuing a Website, Web App, or AI Adoption project:**

We conduct a **technical and operational audit** focused on growth and efficiency.

- Map workflows, integrations, and existing tools.
- Identify friction points in lead generation, delivery, or team processes.
- Define project scope, milestones, deliverables, and timeline.
Clients walk away with a **Project Blueprint** that clearly details how StafflyAI will execute their vision and integrate automation from day one.

No matter the path, every client leaves the audit with clarity, structure, and a ready-to-execute plan.

4A. Candidate Interview (Operator Path)

If the client moves forward with an **Operator Placement**:

- We present 3 vetted candidates from our talent pool.
- The client meets them through guided interviews led by our team.
- Together, we select the best fit based on skill, personality, and schedule alignment.

Once selected, the process moves directly into **Onboarding & Operator Placement**.

4B. Project Onboarding (Website / Web App / AI Adoption Path)

If the client proceeds with a **project-based service**:

- We hold an **Onboarding Call** to introduce the assigned delivery team (developers, project manager, or AI architect).
- Establish initial objectives, milestones, and communication cadence.
- Confirm access to tools, assets, and workflows before development begins.

This ensures every project starts with alignment, ownership, and measurable outcomes.

5. Onboarding & Operator Placement

For Operator Clients:

- **Operator-Led Call:** The operator leads onboarding using our *Executive Assistant Checklist* to immediately build trust and structure.
- **Information Gathering:** Operators collect logins, workflows, and communication preferences.
- **Knowledge Base Creation:** The onboarding call is recorded, transcribed, and stored in the client's workspace — feeding into a **custom GPT** that supports the operator's learning and response accuracy.
- **First 30 Days:** Operators take ownership of daily tasks while Client Success Managers track cadence, output, and feedback.

Each client receives at least one **AI-powered workflow** (e.g., admin automation or social media bot) to ensure early productivity wins.

6. Retention, Referrals & Expansion

Once stabilized:

- Clients receive regular performance reports and biweekly check-ins.
- Client Success Managers proactively identify upsell, downsell, or automation opportunities.
- We request testimonials and referrals after the first measurable milestone.
- Satisfied clients are encouraged to **expand** by adding more operators, upgrading to higher tiers, or integrating AI automation into new departments.

This creates a **continuous growth loop** — delivering more value to clients while compounding recurring revenue for StafflyAI.

Why This System Works

- Paid audits ensure serious, invested clients.
 - Customization by service line keeps fulfillment efficient and premium.
 - The process mirrors enterprise consulting — not transactional outsourcing.
-

Our Client Promise

1. Long-Term Fit

Within 30 days, clients should feel their operator is competent, aligned, and capable of being a long-term asset in their business.

2. Replacement Guarantee

If an operator isn't the right fit, we provide replacements at no cost.

3. Flexible Billing

We offer flexible billing adjustments when needed, especially early in the relationship, to protect client experience and reputation.

4. Productivity Boost

Every client receives at least one AI-powered workflow in their first month, ensuring tangible productivity gains.

Delegation Training & Ongoing Support

1. Delegation Training

We provide clients with proven frameworks (inspired by Patrick Bet-David, Alex Hormozi, and others) that teach effective delegation and leadership. This prevents the “VA failed me” trap.

2. Playbooks & Free Resources

We are developing a Delegation Playbook, SOP templates, and other free resources to support smooth onboarding and ongoing integration.

3. Ongoing Support

Client Success Managers provide continuous oversight:

- Early-stage feedback check-ins on Day 1, 3, 5, and 10.
- Bi-weekly check-ins after integration.
- Continuous operator wellness, cadence tracking, and HR oversight.
- Operators clock hours through our internal API-based system for transparent reporting.

✅ This version highlights:

- Operator-led onboarding (premium + unique).
- Knowledge base + GPT creation (future-proof + differentiator).
- Tangible client wins in the first 30 days.

The Operator Model

At StafflyAI, we classify operators into four levels. Each level represents a different stage of leverage for the client and growth for the operator.

Support Operator (\$1,200–\$1,500/month)

Up to 100 hrs/month

Overview

The Support Operator is for founders who are just learning to delegate. They typically know what needs to be done but haven't had help before. This level is meant to remove the daily noise — tasks that eat time but don't drive revenue.

Typical Founder Profile

- Early-stage solopreneur or small business owner.
- Handles every email, call, and small admin task themselves.
- Knows what they *should* delegate but hasn't trusted anyone to do it yet.

Examples of Support Operator Tasks

- Organizing your inbox and tagging priority emails.
- Managing your calendar and booking meetings.
- Sending and following up on appointment confirmations.
- Creating reminders for upcoming calls or deadlines.
- Light data entry (CRM updates, tracking leads, client info).
- Researching vendors, clients, or local market info.
- Drafting and sending templated messages.
- Managing simple spreadsheets and shared files.
- Following up with prospects using pre-written templates.

Result for Founder

Saves 20-25 hours per week of repetitive work, reduces overwhelm, and begins building confidence in delegation.

Administrative Operator (\$1,800–\$2,200/month)

Up to 120 hrs/month

Overview

The Administrative Operator is for entrepreneurs who already have a system or rhythm but need their time back. This operator is an extension of your workflow — someone who takes over repeatable administrative and marketing operations.

Typical Founder Profile

- Has consistent business and incoming work.
- Spends hours daily managing tasks that aren't revenue-generating.
- Needs help maintaining structure and online presence.

Examples of Administrative Operator Tasks

- Managing inbox and client communication using your tone and templates.
- Handling all scheduling, rescheduling, and client reminders.
- Preparing and organizing documents or proposals.
- Updating CRMs, spreadsheets, or dashboards.
- Coordinating small projects with team members or vendors.
- Posting social media content (prepared by you or your team).
- Scheduling marketing campaigns or newsletters.
- Pulling reports and metrics from tools like Google Sheets or HubSpot.
- Setting up automations or reminders in your system.

Result for Founder

Reclaims 20–30 hours weekly. Your admin workload drops dramatically, consistency increases, and you finally feel organized again without sacrificing quality.

Executive Operator (\$2,500–\$3,000/month)

Up to 160 hrs/month

Overview

The Executive Operator is a high-performing operator who brings systems, structure, and experience. They've worked with other fast-moving founders before and understand how to protect your time and manage complexity.

Typical Founder Profile

- Established business or multiple revenue streams.
- Overloaded with meetings, reports, and client communication.
- Needs someone to think two steps ahead and handle moving parts proactively.

Examples of Executive Operator Tasks

- Managing your full daily schedule, coordinating across departments or vendors.
- Preparing agendas, briefs, and recaps for key meetings.
- Handling client or partner communication with discretion.
- Tracking company KPIs and presenting summaries.
- Coordinating deliverables and deadlines across projects.
- Managing task boards (ClickUp, Asana, Trello, etc.) to ensure follow-through.
- Filtering incoming opportunities and prioritizing what deserves your attention.
- Researching and creating reports or presentations.
- Acting as liaison between you and team members or clients.

Result for Founder

Frees up 35–40 hours a week. You spend your time on strategy and growth instead of firefighting. Decisions are faster, projects stay on track, and your business feels organized and scalable.

Enterprise Operator (\$4,500–\$5,000/month)

Up to 160+ hrs/month

Overview

The Enterprise Operator acts as your Chief of Staff managing priorities, leading assistants, and ensuring the business runs even when you're unavailable. This is an executive-level partner who integrates leadership, project management, and operational oversight.

Typical Founder Profile

- Running multiple teams, departments, or revenue lines.
- Needs an operator to manage execution while they focus on leadership, vision, and scaling.
- Ready to trust someone with budgets, strategic initiatives, and accountability.

Examples of Enterprise Operator Tasks

- Managing multiple assistants or specialists.
- Overseeing project timelines, deliverables, and performance metrics.
- Tracking budgets, invoices, and vendor payments.
- Leading team meetings and preparing executive summaries.
- Handling confidential projects, deals, and company communications.
- Assisting in recruiting, onboarding, and training internal support staff.
- Acting as a liaison between leadership and team members.
- Developing workflows or SOPs for long-term efficiency.

- Managing personal or business logistics for the founder (travel, scheduling, finance coordination).

Result for Founder

Reclaims 50+ hours weekly and gains peace of mind knowing the business operates smoothly without constant oversight. This is where founders shift from *operator* to *CEO*.

Operator Growth Path

StafflyAI isn't about short-term gigs. It's a platform for operators to grow into long-term careers:

1. **Support Operator** → Learns systems and builds trust.
 2. **Administrative Operator** → Manages processes, builds stability.
 3. **Executive Operator** → Partners with the founder, manages decisions.
 4. **Enterprise Operator** → Chief of staff; Leads teams, drives strategy.
 5. **Talent Partner (Optional Path)** → Operators who graduate into mentorship and recruitment roles, helping place and train new operators. This creates a growth loop where experienced operators multiply opportunities for others.
-

Operator Promise (Formerly VA Promise)

Every StafflyAI Operator is backed by three guarantees:

1. Focus & Dedication

Operators are matched to client seats and incentivized for loyalty. Our system is designed for focus and stability, giving clients reliable long-term support.

2. AI-Enhanced Output

Operators are trained on frameworks and equipped with StafflyAI workflows and automations that multiply productivity 2–3x compared to traditional hires.

3. Growth & Retention

Operators earn above-market pay, receive mentorship, and have clear growth paths. This ensures loyalty, retention, and a long-term partnership between operator and client.

✓ With pricing anchors:

- Clients can **self-select** the right level before a sales call.
- It positions **Support Operators as the entry point** while creating **natural ladders to higher-value packages**.
- Keeps StafflyAI firmly **premium** compared to “cheap VA” services.
